

# Rearsense Digital Wireless Camera System

The reliable large vehicle digital wireless monitoring solution

An adaptable digital wireless camera system ideal for truck and trailer large vehicles

## Key Advantages

-  **Ease of use** : Ideal for truck and trailer vehicles when repeatedly detaching and reattaching trailer — no need to re-programme the system each time
-  **Reliable** : Frequency hopping for reduced interference and minimal image delay
-  **Adaptable** : Suitable for large vehicles that can be difficult to connect to rear cameras

-  **Easy pairing with camera**
-  **Rugged design** — engineered to operate in harsh environments, waterproof and vibration resistance
-  **100m max distance reception**
-  **Works alongside Rearsense Heavy Duty Camera System or Extra Heavy Duty Camera System**

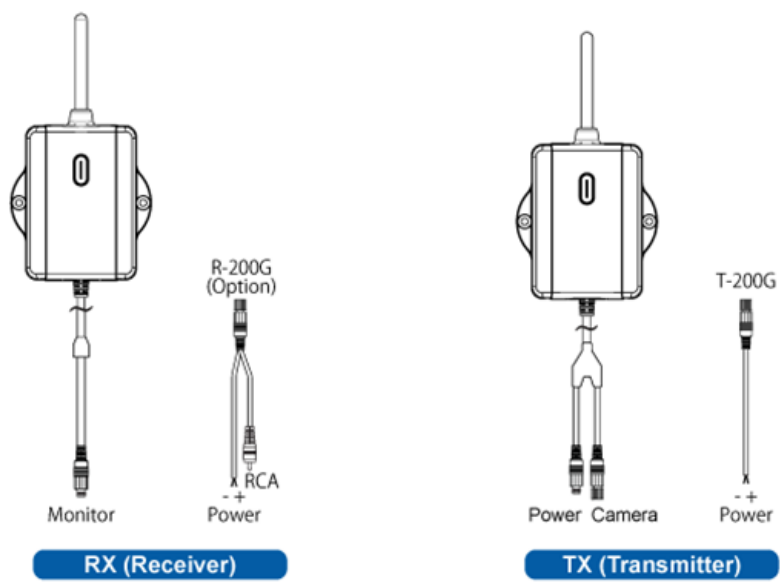

## Product Features

# Rearsense Digital Wireless Camera System

The reliable large vehicle digital wireless monitoring solution

## Technical Specifications

SPECIFICATION(RX / TX)	
Frequency	2400~2483.5MHz
Frame Rate	30fps
Transmission Range	MAX. 100m (Open Field)
IP	68
Operation Temperature	-30°C ~ 70°C
Supply Voltage	DC 12V-24V
Modulation	Adaptive Frequency Hopping
Dimension (W x H x D)	87x94x 25mm
Weight	242g
